Cosponsored by:

NIST
National Institute of
Standards and Technology
Helping make technology safer.

SBA
Small Business Administration
Assisting small businesses nationwide.

Federal Bureau of Investigation
Protecting the U. S. against cyber-based attacks and high-technology crimes.

Can YOU answer the following questions?

What happens to my business if my sensitive business information falls into someone else's possession?

What would it cost me to be without some or all of my sensitive business information?

Could I recreate lost sensitive business information and what would be the cost?

What would be the implications to my business if I could no longer trust the accuracy or completeness of my sensitive business information?

If you can't answer these questions, then you need this workshop!

The NIST Computer Security Division has developed a workshop to **help the small business owner** increase information system security.

- Learn how to define information security (IS) for your organization.

- Hear examples of common types of threats and understand how to determine the extent to which your organization should proactively address threats.

- Learn common Best Practices and procedures to operate more securely.

- Hear a basic explanation of current technologies used in reducing IS vulnerabilities and learn of resources freely available to your organization.
